## INGA M.D. RATEPAYERS HOLD ANNUAL MEETING

The Business Done by the Councillors During  
the Past Year Under Review by  
Those Who Pay the Taxes.

The ratepayers of Inga Municipality held their annual meeting on Saturday in the local town hall, with former Councillor C W Ibsen presiding, and J A Young acting as secretary.

When the minutes of the former meeting were read, it was moved by R C Howat, seconded by Councillor Hopkins, that the minutes be adopted as read.

The chairman then started reading the financial statement item by item, when it was made clear that farmers still have the notion that their business should be conducted in an economical manner, the way they checked over and discussed each item as read.

A motion by W M Washburn, that the Municipality furnish farmers with the chemicals for the destruction of weeds brought several orators to their feet; one of these claiming that the finest and stoutest-looking pig weed he'd ever seen was one which had been treated with weed destroying chemicals.

The item "Aid and relief \$1441.12" provoked some inquiries as to details; when a motion by Councillor Akin, Akin, seconded by Don McDonald carried, that the names of those receiving relief be read to the meeting.

A motion was made by W M Washburn, seconded by

## ROYAL CAFE, STONY PLAIN.

(Phone 38)

ELEVATOR AT GAINFORD.

### Meseck-Rahn.

Mr. Richard Meseck, the well-known young gentleman of Stony Plain district, who left last December for his former home in Germany, has been united in marriage to Miss Gertrude Emma Rahn, Elbing, West Prussia, Germany. The happy young couple have taken up their residence in Elbing.

### Busy Time for the Secretaries

Secretaries of rural municipalities have found this a very arduous month, in getting their auditors ready for the annual meetings. The tax rolls were kept open later than usual, as an accommodation to ratepayers, and the new Tax Consolidation system has made considerable more work for the secretaries.

### Barnum's Rival Show.

Those who prefer their evening's entertainment in mixed packages will find to their liking the bill to be presented at Rosenthal tomorrow night. The Athletic club has prepared a unique series of events, such as has not been seen hereabouts in many moons. One item is the boating contest for amateurs, in which will be seen some of the noted young leather-pushers of the district. Among the entrants in the amateur acting section is the name of that famous character impersonator Herr Michalo Soldan Jr. According to Impressario V M Kotzschefski, this item alone will be worth the price of admission. Other ambitious actors, actresses and actores will be invited to strut their stuff, and will no doubt get the "big hand." Last, but not least, are the two items—a pie social and a dance. This unparalleled, gigantic and unequalled exposition will easily overshadow anything which has heretofore been given here or will be likely to happen again in this anno domini 1934.

O G Wadel, and carried, that the Council negotiate with the Government, in an effort to recover the value on depreciation on municipal machinery used on Government highways; and also that the Council give a true valuation of the machinery, and the number in each division, at next annual meeting.

Dal-gate Howat gave a detailed account of the proceedings at the Municipal Districts convention last November. Mr Washburn moved the adoption of the report, which carried.

A motion by O G Wadel, seconded by C Scott, carried, that when assessment notices are sent out, each notice have on the back thereof a copy of the assessment of each landowner in the Municipality.

The financial statement was adopted, on motion of Ph Schuetz, seconded by O G Wadel.

A motion carried that meeting adjourn.

## HARDWICK'S

## Prevention Of War

As this article is written flaring headlines in the daily newspapers tell of rioting in the streets of Paris and in many of the provincial cities and towns of France; of barricaded streets and buildings in Vienna and other Austrian cities; of population who are Government forces resist and seek to put down uprising on the part of Socialists in that country; of warlike preparations on the part of Russia in Siberia in anticipation of a struggle with Japan. In a word, reports from both Europe and Asia seem to indicate that just below the surface of things there is a seething volcano that may at any moment burst forth to spread death and destruction among the nations on a scale that might surpass the Great War of 1914-1918.

And while the front pages of the daily papers feature these alarming reports, inside pages in many of the larger papers are devoted to the presentation of hundreds of pictures of actual scenes taken in the Great War, and with particular reference to the part taken in that grim struggle by the manhood of this Dominion. Many of these pictures are terrible, shocking, gruesome. They depict little or nothing of what used to be regarded as the glamour and glory of war; instead, they reveal a life passed in the midst and hourly expectation of death, or mutilation worse than death, and in surroundings such as the meanest beast would not tolerate. These pictures illustrate modern war for the awful thing it is, and no doubt the object in presenting these pictures to the public at this time is to develop a horror of war and to strengthen the determination of the people of Canada to resist any future outbreak of hostilities with all the influence it is possible for them to exert.

Admitting the very worthy motive actuating the publication of these pictures, the question nonetheless does intrust itself as to whether such publication will serve the desired purpose; rather, whether the pictures, despite their gory and repulsive nature, may not have exactly the opposite of the desired effect with many persons. It is to be remembered that we are living in very difficult times; that thousands of men are out of employment, living in idleness upon relief payments from the State; that, in particular, the youth of the country to a very great extent are unable to find avenues in which to employ their stored up energies and give full play to their initiative and ambitions. To many of them comes the feeling, amounting almost to a conviction, that anything would be better than the deadening routine of a life of having nothing to do.

Faced at such a time with a pictorial review of all the activity, the excitement, the new experiences and thrills, and the adventure inseparable from war, is there not grave danger that, instead of shocking our youth with the horrors and sufferings of war, we may not actually develop in the minds of many the thought that they would not be averse to undergoing the hardships, sufferings and possible death inseparable from war in order to substitute for their present routine of idleness the experiences, excitements and adventures of war.

In all of us there is a longing for adventure. We all desire to visit foreign lands, to see and experience something new and different. Down through the centuries, and probably never more so than in this present age, men—men, women—enjoy speed, action, thrills. Dashed away nothing in these days to provide desirous of establishing some new record; people are ready to risk their lives in most conceivable kind of an enterprise.

In it were, therefore, no matter how heroic the object sought to be served, to present to the youth of Canada at a time when, temporarily at least, thousands of young men in their teens and early twenties are at loose ends, with nothing to do, daily instalments of a pictorial history of the greatest war of all times showing what their fathers and elder brothers experienced of action and adventure as well as of suffering and death.

There is no glory in war; there is no gain in war. Victor suffers almost as greatly as the vanquished. The last Great War was surely impressed that fact upon the nations. And the aftermath of war, the enormous financial and economic destruction and loss which inevitably follows all wars, brings sorrows, sufferings and ever accumulating losses almost as great as the toll of war itself. Indeed, war instead of solving problems only creates new and even greater ones, leading inevitably to another war. That is the basic cause of the unprecedented length of the present depression, because the apparent inevitability of another world war prevents any return of confidence; rather every person and every nation is planning and preparing for themselves in the light of what may happen and the happening of which is beyond their own control.

The Canadian people do not want war. If the other nations of the world spent no more money or thought on armaments and preparation for war than Canada does, there would be little danger of another war afflicting this old world. The Canadian people are opposed to war, and are desirous of doing everything they can to prevent it. The question is: Are we going about our educational work of prevention in the right way? Rather, is there not a considerable degree of danger that, quite unintentionally, we are creating an impression in certain quarters that, after all, another war might not be wholly undesirable.

About a quarter-million sea-going passengers arrive and depart from London in a year.

Criticize yourself to-day and others tomorrow.

Buildings erected in Shanghai, China, last year are estimated to have cost over \$40,000,000.

Oh, well, some fenders were on pleasure bent, says the Brandon Sun.

## A Tired, Worn Out Woman Can't Make a Happy Home

There is no happiness in the home when the mother is sick and worn out by the never ending household drudgery. She gets run down, becomes fatigued and irritable, has shortness of breath, faint and dizzy, can't sleep, and gets up in the morning feeling as tired as she went to bed, and is downhearted and disengaged.

Milburn's H. & N. Pills will soon convince women it is much easier to suffer than to build up the nervous system and bring back the former health and vigor.

## Will Attempt Daring Aeronautical Feat

### British Parachutist Anxious To Make Drop From Stratosphere

"I want to be the first man to drop from the stratosphere and I'm ready to gamble my life on a jump from a height of 25 miles."

John Tranum, the British parachutist who has survived more than 2,000 jumps, announced in these words the most daring aeronautical feat as yet planned by man. He is appealing to M. E. Ridge, youthful American, who intends to ascend 25 miles by balloon, for passage in the open basket in order to make the leap.

Experts say he will have only a 50-50 chance of emerging alive from the drop, even if Ridge should pierce the stratosphere with his daring passenger.

Tranum is tired of "experts" and maintains that a healthy man can safely pass through the terrific ordeal of a 25-mile drop if properly clothed and equipped with a special breathing apparatus. If Ridge accepts the offer, the feat will be attempted in England during 1934. Such distinguished scientists as Prof. J. B. S. Haldane, respiration authority, and Sir Robert Davis, are heartily supporting Ridge in his efforts to arrange for the 25-mile balloon ascent in an open basket. That is twice the height achieved so far in a sealed gondola.

"I've already been up to heights of more than four miles and my record delayed drop was from a height of three and a half miles," said Tranum.

## IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

### No Cured Necessary

For you to feel healthy and happy you must pour four pounds of liquid bile into your body. That's the only way trouble starts. Poor digestion. Shallow elimination. How can the body, General, withstand such a load? It's simple. Take a spoonful of this completely with some bowel-moving chewing gum, or roughage. That's all you need. You need Carter's Little Liver Pills. Purify your body. Get them at your druggist for them by name. Refuse substitutes. 25¢, each dropper.

## Persistent Attempts Made By Man Are Slowly Unfolding the White Mystery of the Antarctic

The present attempts upon the white mystery of the Antarctic seem to be beginning in a tamer atmosphere of drama than that which met the old Byrd expedition. For the first ice conditions have proved unusual. The Ellsworth expedition, when it finally reached the Bay of Whales, saw no evidence of movement, never before reported, in the solid shelf ice which surrounds and forms the bay. Chunks were seen to break off from this vast glacier, estimated to be several hundred feet thick; while the Ellsworth plane was wrecked in the moving bay below the camp. That ended for this year Ellsworth's bold project for a trans-continental flight from the Ross to the Weddell Sea.

Now the Byrd expedition, successfully reaching Little America after it had been feared that the pack ice would bar the road entirely, has only narrowly missed destruction under a fall of the shelf or barrier ice such as Ellsworth reported. A near-disaster to Byrd's big plane on its first flight can scarcely have lessened the excitement. These are reminders of the real perils of Antarctic adventure, which, in this area at any rate, must be based upon the edge of a floating glacier, with solid land hundreds of miles away. The compensation is that if conditions are really changing in the Bay of Whales the phenomenon offers more opportunity for unlocking the many still hidden secrets of that last unknown continent.

Something Admiral Byrd has already been able to contribute. By his flights from shipboard he was able to push back the white space on life charts which conceals the actual coast line through the thousand miles or so between the Ross Sea area and the region of Wilkins' discoveries below the tip of South America. No one has ever seen land in that sector; no one even knows whether there is a continental mass there or only, perhaps, scattered islands. Wilkins was able to reduce Graham Land, once thought to be a projection of the continent, to an archipelago; but what lies between His Heard Land, near the 80th meridian, and Marie Byrd Land, which seems to form the eastern shore of the Ross Sea, between the 140th and 150th meridians; no one can tell. Wilkins took one bite, by aeroplane, out of this unknown quadrant, finding no land; Byrd has now taken another, with the same result. But his present purpose is to clear up the mystery as far as he can. Slowly, despite all the perils which it holds, the Antarctic Continent has been taking form upon our charts, and sooner or later its whole shape must be known.—New York Herald Tribune.

### Island Of Small Farmers

Coffee Is Chief Crop Of Haiti's Negro Republic

The negro republic of Haiti is a land of small farmers, only two percent, it is estimated, of the agricultural production being the outcome of the plantation method. Coffee is the chief crop. It would scarcely be correct to say that the crop is cultivated, as it actually grows wild and is harvested rather than cultivated. In the absence of direct steamship communication between Canada and Haiti, many Canadian commodities reaching the market lose their identity through the port of New York being shown on the returns as U.S. origin.

Sportsman (at reception) — I should like to try my hand at big game.

Mrs. Green—Yes, I suppose you find it hard to hit those little birds.

There are approximately 170 farms growing or dealing with tree nursery stock, including fruit trees, in Canada.

### One Of Strange Hobbies

Some People Spend Much Time Making Small Books

Among the strangest of strange hobbies is the desire to make small books, but it is one on which people at various times have spent a great deal of thought and effort.

The world's smallest book was made in Holland in the year 1674, by someone named Carl Van Lange. There are 49 pages in it, and each of them, including the margins all round the printed text, is only about seven-tenths of an inch long and three-tenths of an inch wide. Its title is "The Court of Flowers." The volume is beautifully bound in calf leather ornamented with gold, and provided with a gold clasp.

### Winnipeg Newspaper Union

By Ruth Rogers

### WEARABLE AND SMART—ESPECIALLY FLATTERING TO THE WOMAN OF HEAVIER FIGURE

Charming day wear with most helpful slimming lines for matrons and figures of heavier build.

In the new collection there is in the world to wear carried out as picture in navy blue mossy ribbed crepe. Its only adoration is the green novelty belt buckle.

Two tons crepe skirt would also look well for this model. For instance, navy blue with the one-sided rever and bow of powder-blue is stunning.

The fascinating printed crepes are also smart and suitable.

It's so easily made.

Style No. 512 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bus.

Size 36 requires 4½ yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Farm Size Increase

Mechanical Power On The Farm Large Responsible For Larger Holdings

The increase in the size of Canadian farms, particularly in the spring wheat area, is attributable mainly to improvements in farm machinery and to the introduction of mechanical power. According to figures of the Economics branch, Dominion department of agriculture, during the 20-year period from 1871 to 1891, there was practically no change in the average size of farms, the acreage being reported as slightly in excess of 97 acres for each census year. From 1891 to 1911, the average expanded rapidly from 124.4 acres to 224.5 acres. Using Saskatchewan to illustrate the change in the spring wheat area, it will be found that the average per farm increased rapidly since 1911 with but a slight change from 285.1 acres to 295.2 acres per farm for the decade preceding that year. In 1931 the average size of farms in Saskatchewan was 408 acres. Acres of improved land increased from 83.5 to 245.9 acres, or nearly 200 per cent. There was approximately the same increase in the number of acres sown to wheat.

### Producing Turkey Meat

Sixty-Four Pounds of Grain To Produce A 16-Pound Turkey

Experiments show that when turkeys are fed without free range, it takes five and a half pounds of mixed grain to produce one pound of flesh, but as at least 99 per cent of the turkeys in Canada are fed with free range, these figures cannot apply, says Mr. F. C. Elford, Dominion Poultry Husbandman. Figures obtained in the three prairie provinces, where 75 per cent of Canada's turkeys are grown, show that 50 to 60 pounds of grain will produce a 16-pound turkey. But in order to be conservative, 64 pounds of grain may be allowed for the 16 pounds of turkey meat, or four pounds of feed to one pound of flesh. Turkeys brought to the farmer an average of nine cents per pound in 1932 (18 cents in 1931). At the 1932 average price a 16-pound turkey brought \$1.44, paying a gross return of \$0.25 per cwt. for grain and \$1.40, 91 cents, and 86 cents for wheat, barley, and oats, or an increase for each of these per bushel of \$1.00, 71 cents, and 67 cents.

### Enemy Of Man's Supremacy

Insects Are The Most Dangerous Enemy Of Man

Notwithstanding their remarkably interesting structures, transformations, and habits, insects as a group are the most dangerous of the animal kingdom. They are, in fact, man's chief competitors for the supremacy of the earth. In the whole world over 600,000 different kinds of insects have been studied, and probably as many more distinct species await classification. Man and insects want the same things for food, and they want to occupy the same places. — Dominion Entomological Branch.

Harbin, Manchukuo, now has nearly 100,000 Russians.

### CHANGES IN THE POST OFFICE DEPARTMENT

Arrangements are being made to superannuate J. L. Gaboury (left), Deputy Postmaster-General of Canada, because of ill-health, and V. T. Coolican (right), Assistant Deputy, is reported to be his likely successor. Mr. Gaboury has been in the public service since 1915.

## Advance In Price Of Gold Results In Marked Stimulus To Gold Mining In Canada

### The Praying Mantis

Insect May Be Used In West To Combat Hopper Menace

In the co-operative efforts of the Dominion and provincial departments of agriculture and the various municipalities and farming societies for the control of grasshoppers, no possible means of exterminating the plague is overlooked. During last fall certain members of the staff of the Dominion parasitic laboratory at Belleville, Ont., collected egg masses of the praying mantis in the Belleville-Napanee-Pictou area where this insect has been increasingly abundant during the past three years. The praying mantis feeds to a large extent on grasshoppers and the eggs have been collected with the intention of investigating the possibility of colonizing the praying mantis at points in western Canada where grasshoppers are a serious pest. The praying mantis is remarkable for its grotesque figure and for holding its formidable fore-legs in a manner suggesting hands folded in prayer—hence its name. However, the mantis preys on other insects and its devout attitude merely covers its tempestuous moments of watchfulness.

### Newspaper In The Lead

Cheapest And Best Form Of Advertising Survey Shows

What is described as one of the most exhaustive surveys ever taken in Los Angeles for the purpose of determining "buyers' wishes" has resulted in the following conclusions:

That 77 per cent paid no attention to advertising matter thrown into their yards.

That 86 per cent of all women and 67 per cent of the men watch for newspaper advertisements of special sales.

That illustrated newspaper advertising was preferred 9 to 1.

Both men and women picked newspapers first when asked what advertising medium they preferred.

The newspaper continues to be the cheapest and best form of publicity for all lines of business. Nothing begins to approach it in reaching all the public, and no other medium is as inexpensive.

### Gardens In The Shums

In order to keep children off the streets in the poorest parts of London, England, and teach them some of the wonders of nature, eight beautiful gardens have been transformed from mere rubbish heaps in the shums by the directed efforts of the children, under a committee of general horticulturists and others. It is now called the London Children's Garden Fund. The produce of each plot is the property of the child to whom it belongs.

The recent rainfall in El Salvador was the heaviest in years and caused heavy damage to property and crops.

With the United States paying \$35 per ounce for gold, shipments of the precious metal from Canada are now going across the international boundary instead of the whole going to London, which was the destination for the bulk of the output since last May. With Ottawa diverting the stream of yellow metal from England to the United States, Canadian mining companies are obtaining the full advantage of the American gold price, just as the mint charged, but plus the difference in exchange, which brings the return slightly above \$35 per ounce.

Ore that could not be considered with gold at \$30.87 per ounce, becomes good mill grade at the current price with the result that producers are now taking large tonnages of the material, formerly waste rock, and are running it through their mills at a profit. Low grade mines, that were just getting by on the old standard gold price, are now reaping a nice profit on operations and are beginning to make dividend distribution to shareholders.

While the new price affords benefits to producing companies, it also is having a stimulating effect on the gold mining industry of Canada as a whole. Many old properties that have been idle for years are being plowed for production and already several companies in this class have announced plans for mill installation, while others are starting up with the object of reaching the production stage as rapidly as possible.

Companies and syndicates that have likely looking prospects are breaking ground at a rapid rate to determine surface possibilities and soon as some indication of values is obtained, diamond drilling is started and is followed by shaft sinking and underground development. It is a safe estimate at this time to say that by the end of the current year Canada will bring in between 20 and 30 new gold products.

Gold producers, however, are not the only interests to benefit from the higher gold price. The activities in mining is creating a big demand for labor in the various fields; it is furnishing a market for steel, tools, machinery and equipment and also is responsible for large sales of clothing, foodstuffs, all of which have direct bearing on the labor situation in Canada.

### Burdensome Surplus

World's Wheat Supply Is Still Reported To Be Heavy

The world wheat crop, excluding Russia, now appears 190 million bushels larger than was estimated four months ago. At the same time the world crop is 200 million bushels smaller than in 1932 and over 400 million bushels smaller than the 1928 crop, according to the Food Research Institute of Stanford University, Calif.

World wheat supplies for 1933-34 are only about 100 million bushels smaller than in 1932-33. In the major exporting countries supplies are much smaller than in 1932-33, particularly in the U.S. and Canada, but European supplies are much larger. This holds true whether or not Russia is included.

The position is, the Institute finds, that while imports have been made upon the world wheat surplus it still remains burdensome.

### Cancel The Permit

Scottish courts seem to depend to quite an extent on the cancellation of the license to drive, and the knowledge that an accident or a charge in court is liable to result in the car being made useless for a term of years undoubtedly has an effect in producing caution in drivers.

Smithson—"I hesitate to mention it," Mrs. Greylock, but your husband owed me two dollars when he died."

Widow—"Really? Oh, well, I know you're glad that you have something to remember him by."

## WORLD HAPPENINGS BRIEFLY TOLD

The prison population of Canada at the beginning of the current year numbered 4,587.

The Prince of Wales has become chief patron of the Public Schools Exploring Society, which last summer organized an expedition to northern Finland.

The "Winnie Mae," which Wiley Post twice has flown around the world, may be groomed for the British-sponsored air race between England and Australia this fall, the globe-girdling flyer indicated.

The estimated annual saving arising out of the reduction or cancellation of dependents' pensions caused by the pension review in 1932 and 1933 was \$124,528. This information was given in the house of commons.

The Archbishop of Canterbury in the church assembly disclosed that \$100,000 of the \$250,000 sought from the public has already been raised towards the purchase price of the famous fourth-century biblical manuscript, the Codex Sinaiticus.

Because another 1,000 "war widows" receiving pensions were married during the past year the treasury will be able to save \$250,000 in the new budget. There remain 134,650 war widows who have not remarried.

Reduction of interest rates on western farm mortgages and provision for intermediate agricultural credits were advocated as preliminary steps for the rehabilitation of the western provinces by John M. Imrie, managing director of the Edmonton Journal, in an address.

A committee of seven members of the house of commons will inquire into work of the Canadian Radio Broadcasting Commission this session, suggesting improvements. Premier R. B. Bennett gave notice of the government's intention to establish the committee.

### Numbers Are Necessary

Reuss is an ancient principality in Thuringia, Germany, where for some unexplained reason all the men of the noble families are called Heinrich, or Henry. To distinguish themselves they have to add numbers to their names. All this is to explain why on the register of a Montreal hotel there appear the name "Prince Henry XXXIII of Reuss."

## Safe Way To Reduce

### 39 lbs. Off—and She Feels Better

A woman who has found a sure, safe way to lose fat—without freak dieting or dangerous drugs—writes:

"A year ago I was eaten up with rheumatism, and was far too fat. I weighed 154 lbs., and, as my height is only 5 feet, incidentally, you can imagine appearance. I took Kruschen regularly, and not dicled, and now I weigh 115 lbs., which is just nice, and, further, I feel better in health and my rheumatism has vanished." (Name withheld.)

Unlike certain drastic drugs, Kruschen does not aim to reduce by rushing food through the body; its action is not confined to a single part of the system. It has a tonic effect upon every organ, stimulating every gland, every nerve, every vein. Gently, but surely, it rids the system of all fat-forming food refuse, of all poisons which give rise to rheumatism, digestive disorders, and many other ills.

**FREE TRIAL OFFER**

If you have never tried Kruschen—try it now at our expense. We have distributed a great number of free samples, and we are ready to give you to prove our claims for yourself. Ask your druggist for the new "GIANT" 75c. This consists of our regular 75c. sample together with a 50c. bottle of Kruschen, making a week's supply. Open the little bottle first, put it to the lips and drink it down. Then open the Kruschen and everything it claim is to do, the Kruschen does. Your druggist is authorized to return you 75c. if you are not satisfied. What could be fairer? Manufactured by the Kruschen Company, 100 King Street West, (Established 1766). Importers: McGillivray Bros. Ltd., Toronto.

It is a remarkable series of ideal men by

idealizing the real man, turning the impulsive Simon into Peter the rock, changing Phariseus Saul into Paul, and the cursing son of thunder into the loving John.

Cultivate Christian idealism, and you may repeat his highest miracle—the transformation of the character of your friends!"—(James Bashford).

Andrew Peter's brother, it will be no surprise, Peter to Jesus, "Behold, I bring the distinction of being the first missionary of the Kingdom of Heaven." James and John, sons of Zebedee, Jesus called Boanerges, Sons of Thunder, James was the first to believe, John to submit to baptism. (Acts 12:2.) John is known as "the disciple whom Jesus loved." He is associated with Peter in the events narrated in the early chapters of The Twelfth.

Philip, who will be shown the Name of Gordon H. Guest, M.A.)

To the average person the term "explosives" suggests the idea of war, but no industry producing explosives could exist if it were dependent on wars for its business. Explosives play an important part in our modern civilization because they are used chiefly for constructive purposes, rather than destructive. Our supplies of coal, iron, and other metals are dependent upon the use of dynamite and gunpowder.

To the Chinese is given the credit

of inventing black gunpowder, which

is a mixture of saltpetre, charcoal,

and sulphur. They used it hundreds

of years ago in making firecrackers.

## PRISON REVOLT THREATS COME FROM KINGSTON

Ottawa.—Communist agitators were at the bottom of recent threatened revolts at Kingston penitentiary, Minister of Justice Hugh Guthrie told the house of commons. It had become difficult to maintain order there because the Canadian Labor Defence League had attempted to create sympathy for the eight Toronto Reds sentenced to penitentiary more than a year ago, through different public channels.

"Time after time we have had threatened revolts there," said the minister, referring to the stonewalled prison on Portsmouth bar. "Every prisoner from Toronto has come there and said: 'Boys, the newspapers are for you, the churches are for you, everybody is for you. We will have another revolution and we'll all get out.' A very serious situation has resulted."

Thousands of appeals and demands, referring to the Toronto Communists, had been received by him in recent months, said Mr. Guthrie, most of whom suggested or sponsored by the Canadian Labor Defence League and the Workers' Unity League.

At the same time he announced a scheme of segregation would be instituted in Canadian penitentiaries based on the plan of D. M. Ormond, superintendent of penitentiaries, which would include a board in each prison consisting of officials and a staff psychologist to examine each man.

Prison administration was discussed when Miss Agnes Macphail, the only woman in the house, proposed a parliamentary committee to inquire into prison life and the causes of crime. Debate on the motion was not concluded. Wages for convicts was proposed by Miss Macphail.

Charges that old-time barbarism was practised in Kingston penitentiary, were levelled by Gen. A. E. Ross, Conservative member for that city. He flourished a paddle, a strap used to punish recalcitrant prisoners, before the startled members, and urged that wardens be prohibited from using it. Studied with hoots, he claimed the paddle would lift the hide from a man's back, "shaking the flea like a bowl of jelly."

The penitentiary, said Gen. Ross, possessed a dungeon or hole, five feet underground with restricted light ventilation only through a pipe extending to the warden's room. "That hole is there and let us remove it, he said.

### Unique Collection

#### Sixty Parliament Houses Within The British Empire

London.—In one way or another the empire has 60 parliament houses, nearly every one following the rectangular model of the mother of parliament's debating chamber with the government and opposition facing each other.

This is well illustrated in the unique collection of pictures of the parliament houses of the empire, on exhibition at the press gallery at Westminster. The exhibition was opened by Captain Edward Fitzroy, speaker of the British house of commons.

#### Regulations Must Be Fair

Edmonton.—Western farmers should be compensated for reduction of wheat acreage, declared A. G. Andrews, U.P.A., Sedgewick, speaking in the legislature in the debate on the house throne speech. "Something must be done to curtail the production of wheat in order to get rid of the surplus but regulations must be fair to the farmers of the west," said Mr. Andrews.

#### Early Marriages

Ames, Iowa.—Prof. George H. Van Tungeln of the Iowa State College sociology department, said young people were marrying earlier and in increasing numbers. And, said the sociologist, "though one marriage in six breaks up, divorces are decreasing."

W. N. U. 2034

### Trade With Russia

#### Anglo-Russian Pact To Stimulate Trade Between Countries

London.—Increased purchases of all kinds of British goods by Russia, it was learned, is the basis of an Anglo-Russian trade agreement.

The new pact calls upon the Soviet Union to buy approximately as much as it sells to Great Britain.

This means an annual increase of about \$20,000,000 in British exports, based on figures of the last normal trading year, 1932.

The correction in the present trade balance, which now heavily favors Russia, will not be made immediately, however.

It is understood the Soviets will be permitted to sell about \$1,600,000 worth of goods to Great Britain for every \$1,000,000 worth bought. This ratio will be gradually corrected until Russia buys as much as it sells here.

The balance will take into consideration the visible exports of each country, such as tourist trade.

### To Assist Dairymen

#### Appeal To Government To Stop Price Cutting Of Creamery Butter

Edmonton.—An appeal to the Dominion government to provide legislation to stop price cutting of creamery butter was made by the closing session of the 28th annual Alberta dairy convention here. The meeting elected T. M. Carlyle, of Calgary, president, and chose Calgary for the convention of 1935.

The meeting also ratified a resolution carried by the producers' section, asking for a federal marketing board and resolutions from both producers' and manufacturers' sections urging compulsory grading and marking of all butter sold at retail. The proviso was added that marking be made not effective in Alberta until implemented in British Columbia, and the resolution requested enabling legislation from Dominion and province and a copy was addressed to the B.C. Dairymen's association.

### Big Fur Catch

#### Northern Trappers Report Largest Returns In History

Winnipeg.—Across Canada's vast northland, from the fringe of the Arctic through the barren lands and the wooded tundra further south, the fur trade is booming.

Northern traders reaching Winnipeg from frontier points declared the greatest fur catch in history was in progress. From widely scattered points in isolated interior came word of phenomenal yields.

A Fort Chipewyan, Alta., trader has 3,000 fox skins, and none in that district have less than 1,000 skins, the trader said. The stimulation of the trade has increased business throughout the north country. Outgoing planes and dog teams are laden with pelts.

The same story was told in northern Ontario, Manitoba, Saskatchewan, Alberta and British Columbia.

### Alberta Cattle Shipment

#### Carload Will Be Sold By Auction In England

Edmonton.—As a result of efforts being made by the Dominion Holstein Association to find a market for surplus stock in Great Britain, one carload of southern Alberta cattle has been shipped and will be sold at auction in the Old Country, while a second car is now being selected for shipment from Edmonton. This was revealed in a report made at a meeting of the Alberta Holstein association by Harry Hays, Calgary, provincial chairman.

#### Not So Many Tourists

Ottawa.—During the past calendar year 2,233,418 tourist automobiles entered Canada for a period of 34 hours; \$66,136 for a period not exceeding 60 days, and \$33 for a period exceeding 60 days, according to a statement issued by the department of national revenue. This showed a considerable falling-off as compared with 1932.

### BLAMES LONDON TREATY

### Alberta Wheat Champion

#### W. J. Bryant Wins Honors At Provincial Seed Fair

Calgary.—Ten dollars won as first prize for sweet clover at last year's fair was used to purchase certified wheat seed which produced a sample of reward that won for William J. Bryant, Boyle, Alta., the championship wheat title at the Alberta seed fair here.

It was the first time Bryant had shown wheat here but he is well known as sweet clover champion of Canada, having won first prize at the Royal Winter Fair, Toronto. He took third place in sweet clover at the World's Grain Show at Regina last year.

At the International Hay and Grain Show at Chicago, Bryant, who has only been farming for eight years, secured a second for sweet clover and a sixth for wheat. His sweet clover took first place at the Alberta fair.

Lethbridge growers took major honors. In the first judging awards announced, Hadlington Brothers of Lethbridge placed first in the spring wheat section, registered or certified. J. D. Morris, Hardisty, was second, and J. W. Shearer of Morrin, third.

In the spring wheat class, early varieties, the Smith Farm, Limited, Letbridge, placed second to P. J. Rock of Morrin, while W. S. Giffen, Lethbridge, was second in the winter wheat section, any hardy variety.

John A. Neil of Morrin was first. Top award in the open oats class, for junior grain clubs only, Grande Prairie was first, Edson second and Brightview third.

### Long Deadlock Likely

#### Treaty Situation At Standstill Between United Kingdom And France

London.—Indications were that a long commercial deadlock between the United Kingdom and France would result from the latest retaliatory measures between the two nations.

With a 20 per cent. increase in British duties on French goods in effect, and trade conventions giving British ships advantages in French ports denounced by France, it was considered likely in political circles that it would be a long time before there was any definite move to ease the situation.

The British government meant while it let it be known the Anglo-Russian trade agreement, after months of painstaking negotiations, is now completely drafted ready for signature, after which it is to be ratified by the house of commons.

The pace provides for re-establishment of normal commercial relations between Britain and Russia, broken off since last April at the time of the celebrated espionage trials.

### Promoted To Commander

#### Prince George Now Has High Rank In Royal Navy

London.—The admiralty has announced promotion of Prince George, now on a tour of South Africa, to rank of commander in the royal navy.

It is a double promotion for the king's youngest son, who has been a lieutenant for eight years. Prince George is naval aide-de-camp to His Majesty.

#### Farm Loan Loss

Winnipeg.—The Manitoba Farm Loans association sustained a net loss of \$610,700 for the 12-month period ended April 30, 1933, according to the regular report tabled in the Manitoba legislature. The previous year's loss was \$234,177.

### Quantity Kept Secret

#### U.S. Authorities Not Telling Amount Of Canadian Gold Received

New York.—Canadian gold is owing to the United States to gain the attractive price of \$35 per fine ounce, but in what quantity remains a secret of the authorities.

The price of \$35 is on delivery at the New York Reserve bank, the United States assay office here, or the federal mints. The seller pays freight and insurance, while the United States government deducts 1/4th of 1 per cent. for handling costs and makes minor discounts for assays charges.

The United States government pays by cheque, 98 per cent. at the time of delivery and the remainder after the assay is completed.

### Cow Testing Service

#### Alberta Will Provide A Limited Service To Farmers

Edmonton.—Alberta, starting April 1, will provide a limited cow testing service to farmers sending milk samples to Edmonton for testing, it was announced at the convention of the Alberta Dairymen's association.

It was proposed to furnish monthly record sheets, sample bottles and preservatives and transportation on samples sent by farmers under scheme. The farmer would have to go half way in keeping records of weighing and in submitting samples.

### THE ASSASSINATION OF A KING

One of the most vivid assassination photographs ever made shows Mohammed Nadir Shah, King of Afghanistan, dying in the arms of a member of his staff after he had been shot in the gardens of the Dilawar Palace, Kabul, while addressing a gathering of students. The picture, made by a member of the king's entourage, was smuggled from Afghanistan through secret channels.

## BRITAIN STANDS FOR JUSTICE OF AUSTRIA'S CAUSE

London.—The United Kingdom is in agreement with other nations, notably France and Italy, which hold that the integrity and independence of Austria must be maintained.

This was clearly set forth by Sir John Simon, secretary for foreign affairs, answering a question in the house of commons before eager listeners. He said the British government recognized the justice of the Austrian stand that she cannot tolerate any interference in her internal affairs "from any quarter."

At the same time the minister made it plain that Britain has assumed a "hands-off" policy toward the entire Austro-German situation until the matter is given consideration by the League of Nations council. The United Kingdom would not interfere in the internal affairs of any nation, he said.

Sir John was referring particularly to the Austrian declaration she will appeal to the League of Nations against what she considers German interference in her domestic affairs. Until the League has considered such an appeal the British government could not present its views on the situation, he added.

### Photos Of Eclipse

#### Astronomers Conduct One Of The Most Successful Expeditions In History

Loeap, Caroline Islands.—Scores of photographs which they believe will contribute greatly to further studies of light were obtained by Japanese and United States scientists during a total solar eclipse.

Because of cloudy skies and careful preparations the scientists who journeyed to this lonely mid-Pacific atoll declared themselves confident they had conducted one of the most successful expeditions in the history of astronomy.

They were sought to determine whether light of the sun's corona is direct or reflected and the angle of deflection of the sun's light—which bears on Professor Einstein's relativity theory.

Loeap's 35 natives, equipped with smoke glasses which the scientists had taught them to make, took up positions on the beach at dawn to await the promised show.

They clapped their hands in childhood glee as the sun slowly disappeared, but when darkness came and a fiery crown later leaped from a blackened disk they were silent and sombre.

### High Quality Seed

#### Certified Seed Improves Standing Of Canada's Export Wheat

Calgary.—The Alberta seed fair unanimously passed a resolution declaring that whatever system is devised to meet the provisions of the wheat reduction agreement it should not apply to wheat which is field sown and sold for seed.

The resolution declared the production of registered and certified seed improved and maintains the quality of Canadian export wheat and the producer should be encouraged to continue the production of high quality seed.

### Visiting Western Cities

#### Sir Henry Drayton Conducting Sound Public Finance Campaign

Toronto.—Conducting a "national crusade" in the interest of sound public finance, Sir Henry Drayton, chairman of the Canadian chamber of commerce committee on that subject, left Toronto with S. B. Gunn, Toronto, and W. McL. Clark, secretary of the chamber. They opened the campaign at Brandon, February 15, and are visiting Winnipeg, Regina, Saskatoon, Edmonton, Calgary, Lethbridge, Vancouver, Victoria, and Fort Williams before returning to Toronto early in March.

## OCCASIONAL WIFE

by EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

## SYNOPSIS

Camilla Hoyt and Peter Anson, son and daughter in law, are secretly deciding to live their own lives apart until they are able to marry. Peter is a young struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is a student at the university when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avila Werth, another wealthy woman who has fallen in love with Peter; Syvia Todd, Peter's model, and Guy Matson, his former room-mate with whom he has quarreled. At a party at the university, Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla are left alone by the band themselves and fall asleep on the sand. When they awake it is early morning and Avila and another boy are standing near them. This makes Camilla realize that it is now time for her to part from her and Peter are married. A stumped Camilla is given a new account which requires unloading all her possessions. Camilla's surprise also learns that the account is that of her foster father's company, which has decided on an extensive campaign to boost up lagging business. After a conference with Mr. Bowman, Camilla decides to attempt the work. With ideas running riot in her head she goes home and starts to sketch. The next morning armed with her completed sets out for the agency. The critics were enthusiastic about her work, and Mr. Weeks offers her a salary of \$300.00 per week to start a prospect of having it doubled. She goes to keep a dinner engagement with Peter.

(Now Go On With The Story)

## How Acid Stomach Makes Itself Known to You

**HERE ARE THE SIGNS:**  
Nervousness      Frequent Headaches  
Nausea      Feeling of Weakness  
Indigestion      Stomach Ache  
Loss of Appetite      Sour Stomach  
Nausea      Auto-Intoxication

**WHAT TO DO FOR IT:**

TAKE—2 teaspoonsful of Phillips' Milk of Magnesia every morning when you get up. Mix with 1/2 teaspoonful of water and another before you go to bed.

ON—Take the new Phillips' Milk of Magnesia Tablets—one tablet for each teaspoonful as directed.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dose of Phillips' Milk of Magnesia acts *at once* to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel better immediately.

But—the careful you get REAL milk of magnesia when you buy genuine PHILLIPS' Milk of Magnesia. See the name—PHILLIPS' LIPS™ is on the label.

**ALSO IN TABLET FORM**

Each tiny tablet is the equivalent of one teaspoonful of Genuine Phillips' Milk of Magnesia.

MADE IN CANADA

Phillips' Milk of Magnesia

## CHAPTER XXVII

"We were speaking yesterday," Camilla began steadily, glancing around the table at the men who faced her attentively, "of reaching the household buying public—the women—through the children. And, of course, we can't reach children with adult ideas. There is nothing so attractive to children as a story, and the more the story appeals to their imaginations, the better they like it."

Heads nodded silent and attentive agreement.

"So, I have worked out, very briefly, my suggestion for a story which will lend itself to indefinite time and at the same time make a complete effect from the beginning. At least, it seems that way to me. I am presuming with my judgment for the sake of explanation, of course," she smiled apologetically.

Six nodding heads encouraged her to continue.

"It is a picture story and the characters are the Tiny Tots of Tinyville, who are diminutive people. The general idea is not, of course. All children are familiar with fairies, gnomes, kewpies, brownies and what-not. But I have given to these individual names and characteristics and some new experiences that may appeal to youngsters. There are the chief Tiny Tot family and their relatives and friends—and enemies, presented in colored drawings that require very little text. Most of that is given in their own conversation."

She offered the first card of drawings to Ms. Weeks, then presented one to each of her critics. "I have first made a sketch of each principal character, then a series of stories for the best results, they should run in weekly publications, so as to carry the thought easily from one publication to the next. For monthly advertising, this is a different series, like these, would be more suitable." She stopped and glanced anxiously at the faces of her judges, whose eyes were intent upon her drawings.

Almost simultaneously, the six almost looked at her and then at each other. Without exception, their faces lit up with approval and the comments of approbation pattered about her like hailstones.

"Splendid!"  
"Very clever—noval idea."  
"Best thing I've seen for a long time."  
"You had this idea worked out before?" Mr. Bowman inquired with surprise.

"Not at all. The idea came to me after I talked with you yesterday. As I say, the thought is not entirely new—but I think the presentation of it is."

"Very new," he agreed. "But you didn't tell me you have done all these since you were here yesterday?"

"I did," she smiled. "Of course, I intend to improve them with more time and I should hope the whole project would work out better as I went along—that is, if the suggestion should be used," she added quickly.

Weeks and Bowman looked at each other, smiled and turned at Camilla. "I am afraid they will be used," said Mr. Weeks. "There will be some formality of submitting the plan to the advertising manager of the Wheatheart Corporation, but we shall recommend the idea enthusiastically. I think, Miss Hoyt, that you have a position, and one which is going to keep you pretty busy for a while."

"Nothing could please me more," earnestly.

"But you won't have to do this much work in one day, remember," he chided pleasantly.

"I don't think I could do that

much every day," she laughed. "This was an emergency, you see."

"You always meet emergencies, don't you?" he looked at her with admiration.

"That is quite important, isn't it?" soberly.

"Indeed it is. But the emergency is where most people fail. A sudden responsibility frightens the average person."

"Why?" Camilla wondered. "It just does the opposite for me—it stimulates me, challenges me."

"Then you are the very person we need here, whether you draw Tiny Tots or lumbering giants," he decided. "Now, in regard to salary—much will depend upon the progress and the success of this campaign. Would you take fifty dollars a week to start, and if the returns are satisfactory within two months after the first publicity, we'll double that."

Camilla's head whirled crazily for an instant. She knew that fifty dollars or even a hundred dollars was no fortune, but that she—Camilla—could earn that much money for herself every week, seemed miraculous. She nodded, before her voice could command a sound. "Any arrangement you make are satisfactory to me." Anything, she thought, to get a start, to prove her ability to herself and others—oh, she would have accepted much less for the opportunity to begin her work.

"May I ask one favor of you, Mr. Weeks?" she added hesitantly.

"Why—of course."

"When you submit these to your client," she indicated the drawings, "please don't tell anyone who made them. Your artists need not be known to your advertisers, I suppose?"

"No, not at all, if you prefer to have it that way. Our work goes out as a firm, but usually if an artist is very successful, her individual work attracts attention."

"In that case, it would be all right," she agreed, "but I much prefer to remain anonymous for the present."

Then she was shaking the hands and accepting the compliments of the executive board, and presently found herself in her own car driving toward home. Everything looked changed, different, she thought. As if the world had donned its holiday attire to celebrate her victory. And everywhere she glanced, her Tiny Tots printed themselves on the sky, the treetops, the buildings and pavement—waving their hands at her gleefully.

She turned into the park when she reached the entrance, and drove leisurely along the boulevards. Traffic was not heavy at this time of day, so driving was a pleasure. Later, it became a hazardous responsibility.

Camilla thought about Peter, and her dinner engagement with him tonight. How happy he would be over the news of her success! Six hours was a long time to wait to tell him, but she would make herself be patient. She would go home and rest for awhile before time to dress for dinner, she decided; and realized that she was quite weary, now that the stimulus of anxiety had been withdrawn and the first excitement of victory had passed.

Tomorrow, she would look for an apartment and get settled before Monday, when it had been temporarily arranged that she would begin her work. Rose would be happy over her good news, also. And the thought followed that she would be able to do much for Rose now—far more than she ever had been able to do when she lived with wealth surrounding her. Her social position always has commanded practically all of her allowance. She would be able, also, to slip her own mother an extra bill occasionally if her salary were doubled soon. That meant that she had to succeed. It meant that the Wheatheart Cereal Corporation would prosper and expand. Some day, perhaps, she would acknowledge her part in the campaign to Alexander Hoyt, and deserve the words of approval that he had withheld, always. Why, she had often conjectured, but never decided.

For dinner with Peter that evening she selected a frock of chartruese yellow crepe, severely cut and very recherche for the occasion. She was celebrating not only an impor-

## Trying Open-Air Method

Chinese Government Has New Cure

## For Opium Habit

From Canton, China, comes a new cure for the drug habit. It is an open-air method. The Canton government has issued an official proclamation that on and after March the first all opium addicts, if caught, will be forced to live in roofless houses and endure, so the edict says, "terrible exposure to the elements."

As an opium smoker lies in a closely shuttered, stuffy room, exposure to an unlimited quantity of fresh air is to him the worst of tortures. So the Canton government counts on this aversion to fresh air to bring the opium addicts to their senses.

**Stony Plain W. I. Meeting.**

Eighteen members and visitors attended the regular meeting of the W. I. on Wednesday, at the home of Mrs Malloch. Since the last meeting First Aid kits have been presented to the school. W.I. is offering prizes again this year for the boy or girl making the best progress in school work from Jan. to June, in each of the grades from 1 to 7. They are offering a prize to the scholar in grade 8 who writes the best essay on "Fifty Years of Progress" \*.

The program for the meeting was short speeches by each member. The following topics were discussed:

The Spider—by Mrs Kowansky, The Fascist System—Mrs Bryan Reasons Why People Are Not Happy—Mrs R. A. Walton

Fish—Miss Clarke  
Cultivate—Mrs H. Oppenthaler  
Old Valentine Customs—Mrs F. W. Yeats

Holland's Tulips—Mrs J. F. Clarke

How Sirloin Got Its Name—Mrs E. Wood

Sleep—Mrs Oatway

Roll Call was answered by each member giving a book to the W.I. library: as a result 17 new books have been added to the library at the home of Mrs I. Umbach. The W.I. library is conducted to provide reading material to those who care to take advantage of it; there is no membership fee; books to be returned within 3 weeks from date taken out. Anyone interested may go to Mrs Umbach, the librarian, for information.

**From the Blue Line.**

At home last Sunday Seniors played hookey with Concordia pucksters, winning by 11-3.

Played on ice that wasn't so icy, the game was slow and rough. At half time the locals were in the lead 6-0. Local defense weakened and the Students got the breaks and rapped in 3 to 5. C. Fuhr refired and proved a crowd pleaser in himself.

Next Sunday the "Highland Flingers" from the City are scheduled to play here, and ought to give the locals some opposition.

Juveniles played Red & White in the City on Sunday and lost by 5-1. P. Smith notched the local's only tally, on a pass from P. Ganon.

**A Splendid Record.**

Now that the hockey season is nearing a close, the manager and match-maker of our Junior hockeyists reports no casualties or even any disablements to his players during the 1933-34 season. He expressed the wish that playing conditions continue a little longer, as he intends to have his youths in the playoffs for the Doolittle Trophy in the No game League.

**Blueberry Items.**

A famous hockey game took place Sunday last, between Stony Plain Katzenjammers and Blueberry on the latter's ice. Stony won 5-2. Blueberry lineup: Ed Hubbel, J. Gatzinger, defence: H. Staub, G. Gitzel, G. Gatzinger, forwards: A. Hubbel, goal. Blueberry will play at Stony next Sunday, to get revenge. If they have good success then, they expect to invade the City leagues.

The whist drive and dancing at the school last Friday drew a good crowd. Whist winners: Ladies, Miss Rachel Robertson, Mrs J. S. Aub, 2nd. Mrs Edw. Hvibbel, 1st. F. Thew 2nd. Music was provided by the Baron Orchestra.

**On the Side.**

Today, the 22nd, is the anniversary of the birth of that great United States general, George Washington, the first president of his country.

The Lenten season is now on; so we're likely to hear again the story of the pietist who was accused of breaking Lent because he had eaten a "sandwich containing meat out thicker than three-one hundredths of an inch."

A paper in a town in the East states they have a preacher there who won't even perform a marriage ceremony—he says his conscience won't let him participate in any game of chance.

—A Reminder: Be sure to keep the garage doors open when warming up the motor in your car these cold mornings. Inhalation carbon monoxide gas is fatal.

**Pitzlers' Auction, March 7.**

The Messrs. Ernest and Chris Pitzler will be offering by public sale their entire farm equipment on Wednesday, March 7, commencing at 10 a.m. The equipment consists of farm machinery, horses, cattle, household goods, etc. There will be no reserve on any article; everything will be sold, regardless. There will be no private sales of any articles. Watch for the date—Wed., March 7.
